# ROSINSKI NAMED SFMC VICE CHANCELLOR

An expert in medical education, health manpower and counseling has been appointed Executive Vice Chancellor at UCSF Medical Center.

The appointment of Dr. Edwin F. Rosinski to the newly created position is effective September 1.

Dr. Rosinski, 41, currently is head of the Department of Health Education Research at the University Health Center.

He has served as Deputy Assistant Secretary for Health Manpower at the U.S. Department of Health, Education and Welfare, where Chancellor Lee formerly served as Assistant Secretary for Health and Science Affairs.

At the Medical Center, Dr. Rosinski will be responsible for coordinating student affairs and long range planning. He will also act for the Chancellor in his absence.

Chancellor Lee described Dr. Rosinski as "one of the outstanding leaders in the nation in health professions education. He will bring fresh ideas, broad experience and great energy to the many opportunities and problems facing the San Francisco Medical Center.

Dr. Rosinski is noted for his work on curricula reform in the health sciences and for his studies on health manpower development and use. Experienced in health policies and health manpower planning, he has been concerned with the special needs of education in the health professions and in the development of more effective delivery of health services systems.

At UCSF, he anticipates continuing his efforts to develop more effective student participation in University affairs affecting students. He has long been active in promoting the causes of minority groups in this regard.

Dr. Rosinski received his Ph.D. in education from the University of Buffalo in 1959. He became director of a research project in medical education at Buffalo in 1957. In 1959, he became Professor of Medical Education and Director of the Office of Research in Medical Education at the Medical College of Virginia's School of Medicine. In 1966, he became Special Consultant for Health Manpower at HEW, and became Deputy Assistant Secretary for Health Manpower in 1967. He joined The University of Connecticut in 1968.

During his career, he has served as consultant to a number of foundations and agencies, including the Rockefeller Foundation, the World Health Organization, and the Department of State.

EDWIN F. ROSINSKI, Ed.D.

SAN FRANCISCO MEDICAL CENTER

FALL 1969
VOL. 2, NO. 3

## Citizen's Complaint Form

A "Citizen's Complaint Form" is available for use by any member of the campus community who believes that he has been treated improperly by a member of the University of California San Francisco Medical Center Police Department.

The form will be duplicated without charge by the Office of the Chancellor, the Personnel Office, the Police Department, or by any of the Dean's offices.

In the event an appeal is indicated, it should be delivered to Chairman, Police-Community Advisory Committee, c/o Chancellor Philip R. Lee, 126-S.

**DR. LLOYD H. SMITH, JR., (right) received an honorary Doctor of Science degree from Washington and Lee University in Lexington, Virginia during their commencement ceremonies. W & L President Robert E. R. Huntley made the presentation. As a distinguished alumnus of that university, Dr. Smith was cited for having "the qualities of a truly excellent teacher, in combination with other remarkable skills and accomplishments."**

# Education Continuing Beyond Parnassus For Socially-Concerned UCSFMC Students

Health professions students at the University of California San Francisco Medical Center don't think that their education stops at the classroom, laboratory, or hospital door.

UC's future doctors, nurses, dentists, pharmacists, dental hygienists and other future health professionals have been giving of their time and specialized knowledge as part of class requirements, during summer vacations, or simply on their own time to projects concerned with health care.

Among projects pursued by students are dental care for children of migratory farm workers, information on drug use and misuses for groups of youth and adults, and family life education for fifth and sixth graders in San Francisco city schools.

Participating students are enrolled in the schools of Dentistry, Medicine, Nursing and Pharmacy; as well as those working for advanced degrees in the Graduate Division program.

## Drug Information

One of the most active projects is the Drug Information Committee, an award-winning group of 30 pharmacy students who this year met with youth and adult groups throughout the state and gave over 70 programs on uses and misuses of drugs. This committee received the annual Public Education Award, co-sponsored by the American Pharmaceutical Association and Pfizer Laboratories. Competition for this award is open to all U.S. pharmacy organizations, and this is the first time it has gone to a student group. Committee chairman David Adler, a third-year pharmacy student, said "we think education may be the best answer to the widespread drug abuse problem in this country, because education can dispel the myth and misinformation which obscures facts and creates fear and confusion."

## Tijuana Clinics

Over 40 dental and dental hygiene students along with other UC Medical Center health professional students, spend their summer months and vacation periods in Tijuana, Mexico. While south of the border, the students work in poverty areas of Tijuana and at the clinic of Project Concern, an international and independent medical-relief organization.

The Project Concern clinic houses a medical facility, a dental clinic, a maternity center and a pharmacy. Dental students help the clinic staff to restore teeth, while the dental hygiene students teach proper home dental care. Both medical and nursing students aid in clinic operations . . . the former giving physical examinations to clinic patients and the latter assisting in maternity clinics. Pharmacy students organize the clinic's pharmacy, whose drug supplies are donated by pharmaceutical manufacturers.

## Planned Parenthood

As part of their training in Ambulatory and Community Medicine, nine senior UC medical students have been participating in both the work of the Planned Parenthood Association of San Francisco and the City's school system's Family Life Education program.

Medical students participate in and learn about Planned Parenthood Clinic's operation during the one morning a week they spend there. In the elementary schools, medical students explain the biological aspects of growth and development to fifth and sixth graders. Dr. Herbert Vandervoort, Assistant Clinical Professor Psychiatry and Ambulatory and Community Medicine emphasized that participating students are not only future obstetricians and pediatricians but are also those intending to specialize in other fields of medicine who "wanted the opportunity to work with the kids."

## Mobile Clinics

Twenty dental students will spend their summer in the San Joaquin Valley treating the children of migrant farm workers as the UC Mobile Dental Clinics spend three months on the road. The clinics, one a new, city-bus sized vehicle housing four completely equipped dental offices, and another, a smaller vehicle with one dental office and two X-ray units, will care for approximately 1,200 children. "Most of these children have never been to a dentist," according to the project's director, Dr. Merle E. Morris, specialist in children's dentistry and Associate Clinical Professor of Operative Dentistry. Six dental hygiene students and several pharmacy students will also accompany the team.

## Minority Recruitment

The Committee for Minority Recruitment, composed of UC students from all four professional schools, has sent its members to California campuses to interest students in pursuing careers in the health sciences at UC.

An enthusiastic and active group of about 40 UC students together with a like group from UC's neighbor Polytechnic High School are partners in UC's Companionship Program. Some of the purposes of the program are exchanging opinions, participation in sports and cultural events, and just plain talk. UC students also help with career planning and tutor Poly students in troublesome subjects.

During a 12-week summer program designed to help approximately 70 incoming Educational Opportunity Program students adjust to the new and demanding atmosphere of professional schools, about 30 advanced UC students will act as "preceptors," orienting the new students to Medical Center life. Students attending this summer course will receive academic credit for their course-work in attending lectures, gaining laboratory experience, and doing various sorts of community work. "Preceptors" plan to act as friends and tutors to the new students.

## Medical Teams

In community aid as well as in other areas, the Associated Students of the University of California San Francisco Medical Center sees itself as both an initiating and a facilitating body. Under the auspices of the ASUCSFMC's Commission on Community Health, medical teams totaling about 100 students were on hand to give emergency care and first aid during the peaceful Memorial Day march in Berkeley. Student teams, pledged to the traditions of medical neutrality and identified by white coats with red crosses, had the sanction of local health officials to administer emergency care.

Turning to the organization's initiating role, ASUCSFMC President Alex Stalcup, a third-year medical student, explained a proposal to fund an ASUCSFMC Office of Research in Community Health. Drawing on their own funds, the association would support projects submitted by students who want to work in community health during the summer.

**Television camera zooms in on Dr. Alfred Schuchard, Associate Professor and Chairman of Operative Dentistry as he examines a patient with dental assistant Jean Goodman during a recent UC San Francisco Medical Center Mobile Clinic trip to Sacramento. The Mobile Clinics will spend 12 weeks in the San Joaquin Valley this summer, giving free dental care to the children of migratory farm workers.**

# Mobile Dental Clinics to Treat Migrant Workers' Children

UC Mobile Dental Clinics are following farm workers this summer in the San Joaquin Valley as the workers move from one area to another when crops ripen. The two mobile clinics are staffed by dental students and faculty members are providing free care for the workers' children.

"About 1200 youngsters, most of whom have never been to a dentist, will be treated by teams of our dental, pharmacy and dental hygiene students and faculty," said Dr. Merle E. Morris, specialist in children's dentistry and Associate Clinical Professor of Operative Dentistry, the project's director.

### Residency Requirements

"The children to be cared for by the dental team are from families not covered by MediCal, Medicare, or any major health plan," Dr. Morris said.

Although their annual income puts them in the "economically depressed class," these families are not eligible to receive welfare because they do not stay in one place long enough to fulfill residency requirements. It is difficult for dentists to treat a large transient population when private practice is based on permanent residents.

### Oral Surgery

Ten dental students are participating in each of the two six-week sessions, performing minor oral surgery, restoring teeth and examining patients, while two dental hygiene students are teaching home care, and pharmacy students are helping with surveys, processing records and X-ray films and general management of the clinic.

Students who treat these children are not officially on vacation this summer, but rather are registered at the University of California's San Francisco campus, and are thus fulfilling most of their required clinical study in children's dentistry.

### Needy Children

The Mobile Clinics are scheduled to visit 12 of the workers' camps in the San Joaquin Valley between mid-June and mid-September. "The Mobile Clinic which is city-bus size contains four modern, completely equipped dental offices, and the smaller vehicle houses one dental office and two X-ray units," Dr. Morris stated.

The project is funded by approximately $42,000 from the Elementary and Secondary Education Act, Title I.

# Dr. Werdegar Receives Award For Teaching

At the University of California San Francisco Medical Center, Dr. David Werdegar was named "Distinguished Teacher of the Year." This honor is given annually to a faculty member who is considered an outstanding teacher during his first five years of full-time service.

In making this award the Academic Senate of the San Francisco campus specifically commended the unique contribution made by Dr. Werdegar as a teacher of Community Medicine. He was cited for his effective synthesis of clinical skills and social awareness in developing a broad understanding of the meaning of health and the process of health care.

As part of the interdisciplinary program in Ambulatory and Community Medicine, Dr. Werdegar's students work in poverty program clinics, public health departments, rural practitioners' offices and other community settings.

**Dr. David Werdegar**

Working in the community, the students have an opportunity to perceive the powerful influence of social factors on health and health care; they may perceive more clearly the opportunities for applying their education to the solution of health problems in their society.

Dr. Werdegar is also responsible for the development of the University of California Home Care Program which provides coordinated health care and rehabilitative services to chronically ill patients in San Francisco, in their own homes.

# BULLETIN BRIEFS

DR. MARVIN AUERBACK, Assistant Clinical Professor, Department of Pediatrics, was given the Distinguished Service Medallion at the meeting of the California Heart Association on May 17.

DR. MARTIN J. CLINE, Assistant Professor of Medicine and Radiology, has been elected Chairman of the Western Section of the American Federation for Clinical Research.

DR. J. ENGLEBERT DUNPHY, Professor and Chairman of the Department of Surgery, was awarded an Honorary Fellowship in the Royal College of Surgeons, Edinburgh.

DR. ISIDORE S. EDELMAN, Samuel Neider Research Professor of Medicine and Associate Director of the Cardiovascular Research Institute, has been selected by the Endocrine Society as the recipient of the Eli Lilly Lectureship and Award for 1969.

DR. BILL GAROUTTE, Professor of Anatomy and Neurology, was elected to the presidency of the San Francisco Neurological Society May 10, 1969.

DR. MOSES GROSSMAN, Professor of Pediatrics, and Associate Dean, School of Medicine, has been elected President of the Western Society for Pediatrics.

DR. RICHARD JOSEPH HAVEL was named 12th Faculty Research Lecturer by his colleagues. The Research Lectureship is the highest honor given by the faculty. Dr. Havel, Professor of Medicine and Associate Director of the Cardiovascular Research Institute, presented his lecture in April.

DR. EDWARD C. HILL, Associate Professor of Obstetrics and DR. SALVATORE P. LUCIA, Professor Emeritus of Preventive Medicine, were guest speakers at the 77th Annual Meeting of the Idaho Medical Association.

DR. MALCOLM A. HOLLIDAY, Professor of Pediatrics, has been elected Vice-President of the Society for Pediatric Research.

DR. ROBERT M. FEATHERSTONE, Professor and Chairman of the Department of Pharmacology, has been elected to the vice-presidency of the Undersea Medical Society.

DR. VERNE T. INMAN, Professor and Chairman of the Department of Orthopedic Surgery, Professor of Ambulatory and Community Medicine, and Director, Biomechanics Laboratory, has been appointed a Corresponding Fellow of the British Orthopaedic Association.

DR. HILLIARD KATZ, Associate Clinical Professor of Medicine, addressed the Spanish Society of Cardiology in Madrid, April 30 and the Greek Society of Cardiology in Athens on May 10. Dr. Katz discussed coronary care units at the meetings.

DR. FREDERIC LUDWIG, Professor of Pathology in Residence, and Dernham Senior Fellow, has been named Professor of Pathology at the University of California, Irvine—California College of Medicine.

DR. STACY R. METTIER, SR., Professor of Medicine who retired in 1964, has been named Master of the American College of Physicians. Dr. Mettier has served the American College of Physicians as Governor, Regent, and Vice President.

DR. RONALD E. RASMUSSEN, Assistant Research Physiologist in the Cancer Research Institute has been awarded a fellowship from the Bank of America—Giannini Foundation. He will use the award to pursue research in cell physiology.

DR. LLOYD H. SMITH, Professor and Chairman of the Department of Medicine, was elected President of the American Society for Clinical Investigation and was re-elected Recorder of the Association of American Physicians.

DR. FRANCIS A. SOOY, Professor and Chairman of the Department of Otolaryngology, has been named President of the Society of University Otolaryngologists for 1969-70.

DR. DAVID A. WOOD, Director, Cancer Research Institute, has been reappointed a Research Collaborator for the period April 1, 1969 to June 30, 1970, in the Medical Department of the Atomic Energy Commission's Brookhaven National Laboratory at Upton, New York.

## Bateman, Cannon In New Posts

With the separation of Contracts and Grants from the Business Office in July, Stanley C. Bateman has been named Contracts and Grants Officer and Robert R. Cannon, Business Manager.

Contracts and Grants will remain in Room 64-U (Ext. 2977). The Business Office, however, has moved to 1479 Fourth Avenue (Ext. 1511).

Bateman joined UC at Berkeley in 1948, moved to the San Francisco campus as Accounting Officer in 1952. He was named Business Manager in 1953 and in 1966 also became Assistant to the Vice Chancellor – Graduate Studies and Research.

Cannon has been Assistant to the Vice Chancellor – Administration since 1967. He joined the University in 1966 as Administrative Analyst to the Chancellor.
